

The Lebanese Training Center (LTC) at the **Chamber of Commerce, Industry and Agriculture of Beirut & Mount Lebanon** is pleased to announce the upcoming training:

Introduction to “Lean Manufacturing”

Trainer: Engineer Samir Tabbal, Lean Management Expert; Partner at TAKT Consulting

Date: December 8 & 9, 2017

Time: Friday 9 a.m.-3 p.m. & Saturday 9 a.m.-1 p.m.

Cost: 350\$ all tax included.

Outline: Some of manufacturing activities do not add to the product a form, a fit, or a function that the customer is ready to pay for; as such they are considered as pure waste. “Lean Manufacturing” is defined as a production management system of waste elimination and continuous improvement. To adapt to the changing environment of dynamic markets, organizations should carry out improvements to their work processes systematically and on a continuous basis for their survival. Better quality, shorter delivery delays and lower resources costs will secure the organization a better market positioning, and higher competitiveness.

Target Audience: Managers, executives and engineers in industrial businesses will be introduced to “lean processes and management” to better understand the Lean concept as well as get familiar with the major Lean implementation tools.

- ✓ The LTC offers a 15% discount for the Chamber members
- ✓ Free access to parking
- ✓ Attendance Certificates signed by the Chamber will be delivered to participants
